Ian Chursky

Senior Software Engineer :: AI Engineer :: Full-Stack Engineer :: Software Development Manager :: SDET :: Author
Seattle, WA :: Honolulu, HI | ianchursky@gmail.com | (206) 304-4490

PROFILE

I am a software engineer who has worked on web and mobile applications for 20+ years who is currently transitioning into AI engineering. Visuals of all of these projects and other related projects can be viewed online in my portfolio: ianchursky.pixieset.com/portfolio and my GitHubs: github.com/ianchursky and github.com/9bitStudios and also the "Projects" section below.Technologies used for these can be found in the "Skills" section. I've also written a few e-books in the past which can be found here: leanpub.com/u/ichursky.

** For notes on career breaks for March 2024 through 2026 (moving and career development incorporating AI engineering into my skillset) see note 1 in the "Notes" section at the end of this document. For September 2021 through February 2023 (COVID-19 related interruptions) see note 2.

EXPERIENCE

AI Engineering & Consulting
cornerkick.io
May 2026 - Present

• Set up a personal freelance website to chronicle some freelance AI projects as well as demos created with AI during educational courses taken online. A current completed one entitled "Claude Code: Software Engineering with Generative AI Agents" from Vanderbilt University under Dr. Jules White computing.vanderbilt.edu/bio/jules-white can be found at github.com/ianchursky/expense-tracker-ai developed via Claude Code, React, TypeScript, Next.js, Tailwind CSS, and App Router.
• Currently enrolled in a subsequent course "AI Agents and Agentic AI with Python & Generative AI."
• Currently working on an AI application to consolidate all-time stats for the Seattle University's men's soccer team (of which I am an alumni) using old PDFs of media guides to develop an AI bot where interesting questions can be asked such as "Who has the most goals in school history when the temperature was over 100°F at kickoff? (it's me lol) or "Who has the most assists in the month of November in school history?" and others. It's a work in progress but I'm hoping to roll this into a product or service that can be sold to other college and youth programs (professional organizations are usually pretty good with all time stats) because it is fun and would be fun for teams' end-of-year banquets and other events.This is where the name cornerkick.io comes from because it started with the soccer stats idea a few old fellow soccer alumni had been discussing.

Senior Software Engineer
Claimocity, Remote
claimocity.com
August 2023 - February 2024

• Maintained and enhanced 2 large-scale medical billing SaaS applications (1 for mobile and 1 for desktop) that services numerous doctors, nurse practitioners, facilities (hospitals) and clinics in a full-stack engineer capacity.
• Built and added features to these applications via bug fixing, feature additions and/or enhancements working with numerous different technologies on both the front-end and the back-end.

• Mobile application development for the Claimocity mobile application using the Ionic framework in Angular.js using Express.js (Node.js) API for the business layer/midlayer, and MongoDB for the database running on AWS.
• Web development for the "desktop" version of the Claimocity application (although also using a responsive implementation) utilizing React, Redux, TypeScript, and Saas on the front-end using the CoreUI React framework, Express.js (Node.js) for the API layer, and MongoDB for the database running on AWS.
• Enhanced both the mobile and desktop applications by creating custom components for pagination, bulk actions, permissions, validation, and settings/configuration.
• Used multiple different tools including WebStorm, MongoDB Compass, Docker, Postman and Pritunl.

Senior Full Stack Engineer

Fresh Consulting, Bellevue, WA
freshconsulting.com
February 2023 - May 2023

• Back-end development for the peer mobile app: .NET WebAPI/C#, MongoDB, AWS, and Docker.
• Implemented workflow designs in Figma.

Senior Technical Consultant

Perficient, Remote
perficient.com
August 2015 - September 2021

• Built and maintained multiple versions of Rise Intranet (riseintranet.com), a SaaS product that sits on top of SharePoint to enhance both functionality and appearance. Used by numerous customers across a diversity of industries.
• Initially built out the front-end of Rise v.1.0 (ca. early-2015), utilizing HTML, CSS, and Knockout.js.
• Established a UI theming strategy utilizing Less (lesscss.org) to seamlessly brand intranets for different customers with significantly different visuals and color palettes.
• Wrote scripts in PowerShell to configure SharePoint tenants for deployment of Rise and any additional customizations needed.
• Wrote the API layer of Rise in .NET WebAPI/C# for communication with databases
• Administered and managed MSSQL databases to service multiple customers.
• Migrated the front-end portion of the Knockout.js components of the application over to Vue.js to give Rise better performance and move to more modern technologies (ca. mid-2017).
• Built out a deployment engine by modifying the Microsoft PnP Partner Pack to build a deployment engine. This involved creating and configuring an Azure Active Directory application and standing up a storage container in Azure.
• Managed offshore teams in India in Croatia during ramp-ups for implementing needed new features requested by customers.
• Mentored junior developers going over code reviews and approaches in design patterns in fixing bugs and expanding the product to meet customer needs.
• Built out a new major version of Rise (Rise 3) when SharePoint moved to a more modern look-and-feel for their new sites and site pages using the SPFx framework while maintaining support for customers using older versions of SharePoint. Technologies used included React, Redux, ES6, TypeScript, Node.js, HTML, and CSS (ca. 2020).
• Continued to add new features and fix any reported bugs in both classic and modern Rise while providing support to customers to meet a diverse set of needs.

Web & Mobile Application Developer

Blue Rooster, Seattle, WA
shorturl.at/tw01T
December 2013 - August 2015

• Built and maintained multiple versions of Rise Intranet (riseintranet.com), a SaaS product that sits on top of SharePoint to enhance both functionality and appearance. Used by numerous customers across a diversity of industries. NOTE: This product and the team that built it (us) were acquired by Perficient in August 2015.

• Built architecture on top of Office 365 and SharePoint 2013 using SharePoint REST APIs and JavaScript.
• Front-end development for different clients utilizing HTML, CSS (including CSS preprocessors such as Less and Sass) and different JavaScript frameworks such as Knockout.js, Backbone.js, RequireJS, and others.
• Applied custom solutions to SharePoint 2013 internet web applications using HTML, CSS3, and JavaScript and wrote custom controls in ASP.NET and C#.
• Developed web applications for clients in ASP.NET MVC and C#.

Web Application Developer

Plexipixel, Seattle, WA
shorturl.at/ENiF2
November 2011 - December 2013

• Developed both internet and intranet web applications in ASP.NET, ASP.NET MVC 3 and C# with integrated JavaScript and jQuery application components utilizing AJAX for client server interaction.
• Built web applications running on Amazon EC2 using S3 in Python with the Django framework, architecting model objects for custom data for the presentation layer requested by clients.
• Worked on development of HTML5 games and game engines JavaScript graphics libraries (Raphael.js) and application libraries (Backbone.js).
• Developed Facebook applications in ASP.NET MVC 3 using OAuth 2 for authentication.
• Developed and customized clients' WordPress setups using custom meta fields, custom post types, custom taxonomies, theme options, and plugins.
• Developed Metro UI style apps using HTML5 and JavaScript and RESTful APIs in Visual Studio 2012 RC running on the Windows 8 Release Preview for development.
• Developed and updated pages on MSCOM (Microsoft's main website).
• Orchestrated photo editing and manipulation on images and graphics in Adobe Photoshop CS5 for integration into commercial software.
• Designed and developed websites utilizing HTML, CSS, jQuery, PHP, MySQL and Flash.
• Developed WordPress themes utilizing PHP and MySQL and implemented website solutions for clients on the WordPress platform CMS.

Web Developer / Web Development Manager / SDET

Vesta Labs, Bothell, WA
vestalabs.com
June 2010 - October 2011

• Developed e-commerce solutions following detailed research and analysis of numerous features offered by different platforms with regard to client needs.
• Developed web applications and administration portals for clients in PHP and MySQL that successfully protected and properly distributed highly sensitive data.
• Administrated MySQL database and ran queries to compile data into daily reports and detailed corresponding trends with Google Analytics.
• Wrote public facing web form applications in PHP for collecting customer feedback on commercial products.
• Wrote or generated detailed reports for clients to enable insights into project progress and timelines.
• Managed web development teams both on and offshore, gathered and detailed requirements, and implemented web development solutions for clients across a diversity of platforms.
• Managed QA projects writing detailed daily reports for clients.
• Trained new testers on the process and various stages of development and QA, e.g. alpha, code complete, content complete, release candidate, and finally production. This also included any sort of needed compliance, functional, UI, localization, network, and performance testing and on the utilization of any test tools used at any point within the QA process.
• Also trained testers on writing clear, concise, and specific bug reports including necessary information in the title, description, steps to reproduce, expected result, actual result, and any additional notes to allow developers and/or other testers to efficiently and accurately reproduce the issue.

Web & Application Development
9bit Studios
shorturl.at/jvD1z
2010 - 2022

• Developed WordPress plugins incorporating custom functionality to extend the WordPress platform to meet customer needs.
• Designed UI graphical elements in Adobe Photoshop and integrated them into websites and Flash projects.
• Wrote extensive clear comprehensive documentation to aid and assist customers and clients in tailoring components to meet their needs and/or integrating them into different projects.
• Provided technical support to customers to meet challenges of implementing applications into web environments of differing architecture.

SDET - Xbox LIVE Arcade
Microsoft, Redmond, WA
February 2008 - June 2010

• Built numerous web-based applications -- including UI design -- in ASP.NET (in conjunction with HTML JavaScript, CSS and XML), C#, and MS SQL using the Visual Studio 2008 IDE. Tools created were used by multiple teams internally.
• Administered SQL server database running on Windows Server 2003.
• Wrote a variety of windows applications utilized for software testing for the Xbox 360 in C# and the Xbox XDK. These apps were distributed and used by multiple teams internally. Reduced time commitments on certain projects by more than 50%.
• Established positive developer relationships, provided developer support, and aided and engaged all parties involved with title certification and release processes for Xbox LIVE Arcade.
• Worked with project managers to establish strategies to facilitate the production of the highest possible quality products in order to have the largest draw to consumers in the marketplace.

QA Project Management / QA Senior Test Lead / SDET
VMC, Redmond, WA
vmc.com
September 2005 - February 2008

• Developed Test Plans, Functional Outlines, RATE Documents, Test Specs, & Test Cases and implemented them into the testing process for different projects.
• Developed and managed development of web applications, including UI design, utilizing HTML, CSS, and JavaScript used to aid the testing process for various projects alongside providing training materials for new testers.
• Managed the XBLA division of VMC as a Senior Test Lead. Delegated title management out to test leads and organized and managed the structure and process of the XBLA test organization.
• Worked on numerous games projects across a vast diversity of platforms (Wii, GameBoy Advance, PS2, PSP, Xbox, and Xbox 360) involving many different aspects of test methodology.
• Engaged in extensive communications with client representatives, including kick off meetings, conference calls, writing of daily and weekly status reports, and end of project reports.
• Trained testers in knowledge of compliance test cases and requirements, various types of functional testing, and the information required for quality bug reporting in QA software.
• Traveled on business trips to the VMC office in Montreal, Canada on a number of occasions to set up, manage, and maintain projects conducted on location.
• Monitored and edited bugs before sending them along to client dev teams utilizing numerous different types of bug tracking software (JIRA, DevTrack, Product Studio).
• Worked as a functional and compliance tester across a variety of platforms on a variety of titles.
• Developed and executed test cases for multiple platforms on multiple projects.

• Received extensive training from project managers between projects on the aspects of higher level management of the QA testing process.

Web Development Intern
ShopNow.com (Network Commerce Inc.), Seattle, WA
June 2000 - August 2000

• Worked as a web development intern doing a variety of back-end web development utilizing HTML, JavaScript, CSS, and ASP for e-commerce website shopnow.com developed by Network Commerce Inc.
• Built an internal shopping cart in ASP for Mitsubishi's ordering and shipping of parts and resources related to the client's business.
• Implemented validation controls to forms using JavaScript for multiple websites.

E D U C A T I O N

AI Engineering
Vanderbilt University via Coursera.com
August 2026 - Present

• Completed "Claude Code: Software Engineering with Generative AI Agents", October 2026" pixies.et/3HTMBoww
• Currently enrolled in "AI Agents and Agentic AI with Python & Generative AI"

Bachelor of Science in Biology, Minor in Computer Science & Software Engineering (CSSE)
Seattle University, Seattle, WA
September 2000 - June 2005

• Played on the university soccer team for 3 years on athletic scholarship.
• Was team top scorer sophomore year (2000) with 12 goals despite playing in only 7 games (broken leg). Also was top scorer senior year with 12 goals (2003)
• Was involved in the school campus ministry and went on a mission trip to Tijuana, Mexico in April 2003

General Studies
Tacoma Community College, Tacoma, WA
September 1999 - June 2000

• Freshman year spent taking core classes transferable to 4 year institutions. e.g. trigonometry, political science, sociology, world history, art history, economics, oceanography.
• Played on the university soccer team on full athletic scholarship. Set the league single-season scoring record with 39 goals in 16 games. Record still stands, 27 years on and counting
• Inducted into the school's athletic hall-of-fame 2011

C E R T I F I C A T I O N S

N O T E S

1. I have voluntarily taken a leave of absence from March 2024 to the present day to coordinate a move from Washington to Hawaii (where my wife and her family are from) to split time between the two for our families (grandparents want to see the kids) and have residency in both states. During this time I have done some investing

for income and also some professional development learning AI core principals such as AI workflows, agentic AI, forward deployed engineering and AI orchestration for different purposes so I don't end up as a dinosaur 🦖. I am currently enrolled in AI related courses for professional development including courses entitled "Generative AI Software Engineering" from Vanderbilt University (vanderbilt.edu) via coursera.org. Additionally I am also in an agentic AI certification course at techademy.com, and a course entitled "Build a Multi-Agent Workflow with Claude Code" from kodree.com. As these courses are learn-at-your-own-pace and only require 1-2 hours a day I am currently looking to concurrently get back into full-time work transitioning into a combination of both my software engineering background and AI to move towards AI engineering in this exciting new horizon in our industry.

2. September 2021 - January 2023 - COVID-19 interruption... During the height of the pandemic took time away from work, having to homeschool and take care of our young kids due to COVID-19 shutdowns. During this time also did some investing for income.
